Before First Use

Insert and Format the Memory Card

Insert a TF card before recording. Format the card in the camera before first use.

1. Power on the camera.
2. Press Menu to enter settings.
3. Select Formatting and confirm OK.
4. Wait until formatting completes.

Warning: Formatting erases all files. Back up important data first.

Common Features

Power On / Off

1. Hold Power Button for 3 seconds to turn on the camera.
2. Hold Power Button for at least 3 seconds to power off. The current recording file is saved before shutdown.

Recording Video

1. In standby mode, press the recording button.
2. The front LED and screen timer indicate recording.
3. Press the recording button again or follow the model-specific stop action to save the file.

Recording Audio

1. Press Audio to start audio recording.
2. Press Audio again to stop and save the audio file.

Take Photo

1. In standby or video recording mode, press Photo. The camera plays a shutter sound when the photo is saved.

SOS Function

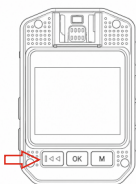

1. Press the PTT/SOS button to activate the SOS light or siren mode.
2. Press again to change or exit the SOS mode according to the model setting.

Warning: Do not use siren mode where it is prohibited.

Playback and Delete Files

1. Open Playback from playback button.
2. Use Left and Right to choose Video, Photo, or Audio folders.
3. Select a file and press OK to play or pause.

Playback Button

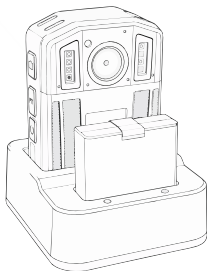

Force Shutdown

1. press Reset hole (Inside USB Cover) with a small pin.
2. Restart the camera after shutdown.

Charge the Camera

1. Open the USB cover and connect the included cable to a 5V charger or computer USB port.
2. The charging LED lights while charging and turns off when fully charged. You can also use the battery base to charge the camera and the battery at the same time.

Warning: Use a 5V charger. Do not use damaged cables.

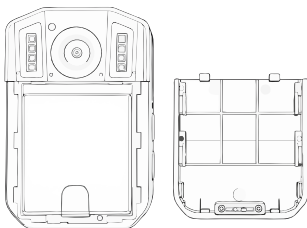

Replace Battery

If you purchased the dual-battery version, unlock and remove the battery cover before replacing the batteries.

1. Slide the battery cover lock to the unlock position.
2. Push the battery cover downward and remove it from the camera.
3. Take out the battery and insert a charged replacement battery in the correct direction.
4. Reinstall the battery cover and lock it before use.

Warning: Power off the camera before replacing batteries. Use only compatible batteries.
